

Solo dosing devices

For water miscible parting and releasant agents

Description of the dosing unit

The dosing unit for water miscible parting and releasant agents is installed in the inlets to the User/Sprayer. The piston displacement of the dosing pumps can be adjusted by 0 to 100% steplessly.

DosaFlexII (flexibel)

Dosing: Proportional doser
Mixing ratio: 1:5 up to 1:300
(depending upon interpretation)
Volume: 1,5ltr./Sec.
Pressure supply: yes (up to 8,0bar)
Pressure pump: electric
Control: relais
Mixing control: no
Concentrate Control: yes
Mixing tank: yes (70ltr.)
Pressure control: pressure switch

DosaTec (flexibel)

Dosing: Proportional doser
Mixing ratio: 1:5 up to 1:300
(depending upon interpretation)
Volume: 1,5ltr./Sec.
Pressure supply: yes (up to 8,0bar)
Pressure pump: double membran pump
Control: relais
Mixing control: no
Concentrate Control: yes
Mixing tank: yes (70ltr.)
Air pressure (Spraying- and blowairregulation): yes

Dosatron (flexibel)

Dosing: Proportional doser
Mixing ratio: 1:5 up to 1:300
(depending upon interpretation)
Volume: 2,5ltr./Sec..
